

Senior Analyst, European Securitization

European Treasury Center, Brussels

Job Responsibilities:

The position of Senior Analyst, European Securitization of the ETC, located in Brussels, will have several developmental opportunities including:

- Manages select European securitization transactions and programs and secured/structured financing for our customer and subsidiary asset groups;
- Primary contact in Europe for select Arranger/Co-Purchase banks and our customers operations on securitization;
- Investigating new products and new countries for future secured/structured financing for our customer
- Negotiating documentation and commercial terms with banks together with cross functional team from our customer

Skills:

Candidates for this position should possess solid analytical, interpretive and numerical skills as well as excellent interpersonal and communication skills as the role requires interacting with many different staffs/groups within and outside the company in a broad range of countries/cultures.

Candidates will also bring a strong aptitude for handling and resolving problems, challenges, and complex reconciliations associated with securitization execution, cash flows and reporting.

In addition to a sound knowledge of financial products, a good knowledge of cash flow modelling and experience in legal documentation of financial transaction is highly desirable.

Competencies:

Candidates for this position should expect to develop valuable experience in the following leadership competencies:

- Drive for Results
- Problem Solving
- Innovative Thinking
- Analytical Thinking/Decision Making
